RESOLVED, that the program in Information Systems leading to the Master of Science degree through the School of Professional Studies at the Graduate School and University Center be approved, effective June 28, 2011, subject to financial ability.

EXPLANATION: This professional degree prepares students to develop and apply the theories, tools, and techniques of information systems, analytics, and technology management through a rigorous, highly quantitative graduate program. Optional tracks within the degree will offer students the opportunity to specialize in areas where the impact of information systems is of particular interest to them. SPS will offer this program in an on-line delivery mode, expanding CUNY’s presence in the virtual education marketplace. This program will add to a suite of SPS’s career directed graduate and undergraduate programs, many of which are also offered in an on-line format.
