RESOLVED, that the dual/joint program in Nursing, leading to the Associate of Applied Science at Queensborough Community College and the Bachelor of Science at York College, be approved, subject to financial ability, effective November 27, 2012.

EXPLANATION: The joining of two existing nursing programs into a dual/joint degree will provide a seamless transfer for students graduating from the Queensborough AAS in Nursing into the York BS in Nursing. As the expected level of education in the nursing profession continues to rise, CUNY needs to encourage and enable our students to pursue additional credentials.
