RESOLVED, that the program in Translational Medicine leading to the Master of Science at City College be approved, effective March 3, 2015, subject to financial ability.

EXPLANATION: Translational Medicine, as applied to technology, refers to the process of transforming — or “translating” - basic science discoveries into practical medical technologies for use with patients. Such technologies include therapeutic drugs, medical devices, diagnostic reagents, and computer applications. CCNY’s proposal for the development of a Translational Medicine degree program is driven by the mounting demand for engineers, physicians, biomedical scientists, and other professionals who can successfully translate our abundant science and technology innovations into actual advances in patient health and healthcare. The Grove School of Engineering developed this program with a grant from the Grove Foundation.
