

**BOARD OF TRUSTEES
THE CITY UNIVERSITY OF NEW YORK**

Predictive Analytic Software System to Support Academic Advisement

RESOLVED: That the Board of Trustees of The City University of New York authorize the General Counsel to execute a contract on behalf of the Office of the University Controller with a vendor who will provide a predictive analytic software system and related consulting services to CUNY's senior colleges. The contract shall be awarded to the vendor under State University of New York Contract No. C005092. The contract term shall be five years. CUNY's purchase of software and services under the contract shall not exceed an estimated annual cost of \$1,000,000, chargeable to appropriate funding sources during the applicable fiscal year or years. The contract shall be subject to approval as to form by the Office of General Counsel.

EXPLANATION: This predictive analytic software system and the affiliated services will support academic advisement and data-based decision making at CUNY senior colleges to better facilitate students' timely progress toward degree completion. The system will provide a predictive model that will detect at-risk students and will combine that with an analytics engine that will identify barriers to completion.
